Sun Compass

by Axel Fischer

This program shows the north direction computed from the sun and the locale position.

Sun Compass

by Axel Fischer

There are two ways of use:

Point the phone to sun and the arrow shows the north direction.

or

Point the arrow to the sun and the phone head shows the north direction.

Additional the direction to Mecca (Q) is shown in every view.

Sun Compass

by Axel Fischer

The position is defined in a list dialog only by integer values for the latitude and longitude. This is enough to get the right direction.

All saved positions are shown in a list.
